

- Machined billet aluminum construction
- Floating blade for consistent shaving depth even on coil or ovaled pipe
- Ideal for pipe prep on coupling, branch fitting and service tee outlet applications
- 1/2" CTS – 8" IPS

Introducing the RiteScrape family of PE pipe & tubing scrapers. The most versatile electrofusion scrapers available today. Utilizing a unique floating blade system, RiteScrape eliminates scrape zone skipping and guide wheel lock up. It even produces a uniform scrape on oval pipe! Why take a chance on missing the mark by using inferior scraping tools? RiteScrape offers complete value; strong, consistent, long lasting and is locally stocked and supported.

Spring loaded, floating blade carriage handles uneven pipe surfaces with ease. Four sided, field replaceable blade is easy to rotate to a new cutting surface.

Sealed bearing guide wheels to ensure smooth travel around the pipe. Resistant to grit and moisture that causes seizing, chatter and skipping on other wheels.
