

BAR PULLER (W&M II)

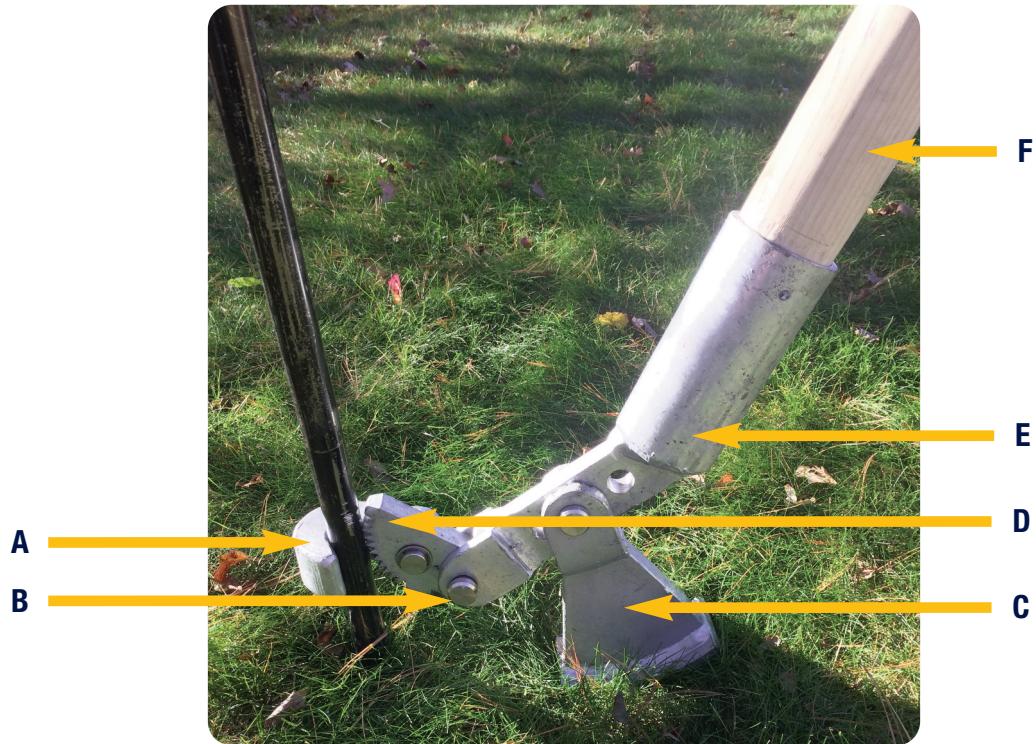

For 50+ years the W&M Bar Puller has made an easy job of pulling bars, pins and pneumatic tool bits from all kinds of ground, during all seasons. The rugged toothed jaw and pivoting hook provide a vise-tight grip on multiple shaft diameters using only one tool. The perfect leverage of its wide based fulcrum allows for quick bar removal with little effort.

ALL NEW PERC BAR PULLER (W&M II) BOASTS THESE GREAT BENEFITS:

- All welded steel design
- Lightweight at less than 20 lbs. total weight
- Designed for one man operation
- Prevents pavement cracking
- Eliminates bar bending caused by other removal methods
- Adjustable to bar/pin diameters of 1/2" - 1 1/4"
- Fantastic for pulling stuck pneumatic tool bits from pavement and concrete
- Works on all ground surfaces during all seasons
